

ALK or ROS1 NSCLC Patient Group

Since CancerGRACE has a forum category for patient user groups, I thought I'd start one for ALK-driven and ROS1-driven cancers. These two genotypes of NSCLC seem similar (although on different chromosomes) and tend to respond to the same drugs (both Xalkori (crizotinib) and 2nd generation treatments), although maybe to different degrees.

Welcome!

Best hopes,

Craig in PA
