Patient Perspectives: Clinical Trials Experiences Through Storytelling

2022-23 Program Form and Application

The Global Resource for Advancing Cancer Education (GRACE; cancerGRACE.org) is a non-profit organization founded by leading Thoracic Oncologist, [Dr. Howard \(Jack\) West](#), in 2007. GRACE's mission is to provide expert-mediated information directly to cancer patients and their caregivers to empower them to become direct partners in their cancer treatment.

GRACE Patient Perspectives: Clinical Trials Experiences Storytelling Program Overview

The goal of this program is to give a voice to patients with experience in participating in a clinical trial, to provide **patient education** for others through storytelling.

Through storytelling and sharing their experience, patients can educate those considering a clinical trial about this aspect of the cancer journey. Storytelling will take form in written, video and/or audio/podcast to reach the largest patient audience.

All cancer patients currently enrolled in, or with past enrollment in a clinical trial are welcomed and encouraged to apply. GRACE's designated committee will review the nominees and select up to 3 participants for the honor of participating in the 2022-23 program.

Benefits of Participation

Patients selected for this year's program will work closely with GRACE to develop new educational content for patients across a range of platforms that will help them become established contributors in the area of advocacy.

Participants will receive training on digitally distributed content and social media, and their work will be highlighted and shared by the internationally recognized non-profit GRACE, along with its network of established leaders in the oncology community and board members with an array of interests and connections.

Participants will receive a stipend, training in communication and media platforms, and a tech 'package'. Participants will work with GRACE to develop program formats and production and will present a proposal based on their area of experience in a clinical trial program. Participants will be expected to attend (via ZOOM) regular meetings through the program year to learn and to discuss their ideas. A minimum of three (3) media productions per participant will be expected by the end of the program. *Our goal is to learn from each other.*

2022 is our second year for this program, and we are excited to generate a platform for patient advocacy and sharing patient education in the area of clinical trials.

Ideal Candidates

Patients dealing with a cancer diagnosis that are currently or have been involved in a clinical trial who have a passion for helping others and for telling their story are ideal for this program. Applicants should have a particular interest and passion for communications, sharing experiences/storytelling, patient education, and looking for a way to give back to the cancer community. Patients with strong written and oral communication skills coupled with a passion for sharing experiences in order to educate and advocate will thrive in this program. GRACE will guide them through boosting their voice to help the cancer patient community.

All application forms must be submitted by July 30, 2022 for consideration. Applicants will be contacted by August 15, 2022 with information regarding acceptance and any next steps.

Any questions, please contact dbrock@cancergrace.org or 888-501-1025 x2.
